

## Red Sea liveaboards: M/Y blue Voyager...

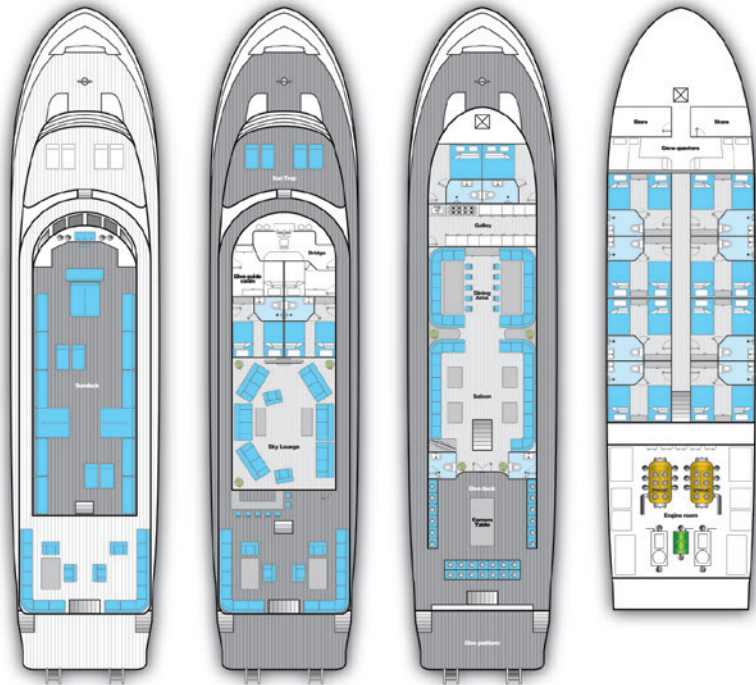

The fourth and most recent addition to the luxury blue o two fleet is **M/Y blue Voyager**.

Built in 2006, **M/Y blue Voyager** is the most recent addition to the blue o two Red Sea fleet and underwent a 10 week refurbishment to ensure that she was sparkling in time for her first sailing at the beginning of April 2011.

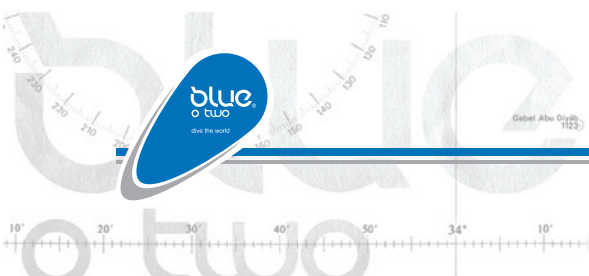

**M/Y blue Voyager** is a 37 metre, steel hulled vessel with the capacity to sleep 24 divers in spacious twin and double cabins. She features a separate dining area and sky lounge, much like **M/Y blue Horizon** and a large dive deck.

**M/Y blue Voyager** is equipped with a nitrox membrane, booster pump and can also cater for rebreather divers.
